abinvarkey.work@gmail.com • +91 7012870819 • [LinkedIn Profile](#) • [Github Profile](#)

Frontend-focused Full Stack Developer with 5 years of experience building production React/Next.js applications at TCS. Mechanical Engineering graduate with a strong portfolio of deployed AI-integrated SaaS products.

SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Saga
- **Backend & DB:** Node.js, MongoDB, Express.js, Firebase, SQL, REST APIs
- **Tools:** Webpack, Babel, Git, Jest, React Testing Library
- **Concepts :** Performance Optimization, Responsive Design, API Integration, debugging, accessibility

WORK EXPERIENCE

Product Engineer, Tata Consultancy Services

Jul 2023 - Present

- Engineered scalable UI features for a low-code banking platform using React.js, TypeScript, and Electron.js, Redux Saga (& Toolkit)
- Orchestrated seamless integration of frontend with backend REST APIs, improving data flow reliability
- Optimized rendering, reducing load times by **30%** and enhancing user experience
- Mitigated security vulnerabilities via **OWASP, Fortify, SAST/DAST**, strengthening compliance posture
- Partnered with design and middleware teams to deliver consistent, user-friendly workflows
- Delivered **40+** user stories end-to-end, including feature development, enhancements, peer code reviews, and deployment within Agile sprints.

System Engineer, Tata Consultancy Services

Feb 2021 - Jun 2023

- Built a **Logger UI** to monitor system events, categorize errors, and track API performance metrics (response time, failure rate), improving debugging efficiency and system reliability
- Optimized **POS workflows** (check load, recall, close operations) improving UI responsiveness by **30%** and enabling faster, smoother checkout interactions
- Refactored multiple modules resolving SonarQube-flagged code smells and vulnerabilities, reducing technical debt and improving performance and maintainability
- Maintained **95%+** feature accuracy with **<5%** defect rate across sprint deliverables, consistently meeting release commitments

PERSONAL PROJECTS

Forever - eCommerce Full Stack • [Live Demo](#) • [Admin Panel Demo](#) • [Github link](#)

React.js, Node.js, Express, MongoDB, Stripe, Razorpay, TailwindCSS, Vercel

- Built and deployed a **full-stack eCommerce app** with product browsing, cart management, and multi-gateway payments (**Stripe + Razorpay**)
- Implemented **JWT-based authentication**, admin dashboard for product/order management, and variant-level inventory tracking
- Optimized application performance to achieve 88 Lighthouse Performance score, 0ms Total Blocking Time, and ~0.8s FCP, ensuring fast and responsive user experience.

AI-Powered LMS SaaS Platform • [Github link](#)

Next.js, Supabase, Vapi, Stripe, Clerk, Sentry

- Built a full-stack learning platform with real-time AI voice companions using Vapi, enabling interactive tutoring sessions with sub-second conversational response and session history tracking
- Architected multi-tier subscription billing with Stripe and Clerk, implementing role-based feature gating, plan enforcement middleware, and upgrade flows across Free and Pro tiers

Real-Time Stock Market Dashboard | Next.js, Better Auth, Inngest, AI • [Github link](#)

- Built a full-stack stock tracking app with live price feeds, interactive charts, and personalized watchlists, leveraging Next.js App Router for performant server/client rendering
- Implemented AI-powered market insights and automated daily news summaries using Inngest background jobs, reducing manual data aggregation overhead

EDUCATION

Aug 2016 - Jul 2020

Bachelor of Technology in Mechanical Engineering

- T. K. M. College of Engineering, Kerala
